

Programme Overview

The post graduate programme is aimed at producing competent, versatile and knowledgeable doctors and health professionals who would be able to function as advisors, practitioners in Defence Health. Graduates would be competent in the field of medicine related to various medical and healthcare operations in austere settings as well as in humanitarian and disaster relief operations. The uniqueness of the programme is the combination of the various aspects of healthcare that are relevant to industry and defence health services. All graduates from the Master of Public Health (Defence Health) programmes are expected to provide the best of healthcare at any time, readily deployable and able to function effectively in any place and be able to resolve problems that arise in critical and conflict situations. This programme is designed to comply fully with the Vision and Mission of the Malaysian Ministry of Education:

To turn Malaysia into a centre of excellence for higher education; and

To develop and put in place a higher education environment that encourages the growth of premier knowledge centres and individuals who are competent, innovated with high moral values in order to meet national and international needs
